## RL-RZ Race Label Razor

## For Straight Cylindrical Containers

### Capabilities

With the needs of Wineries and Breweries in mind, **The Race Razor** was designed for labeling straight cylindrical bottles and containers. The RL-RZ is extremely easy to operate and can apply a single label or front and back labels that are alternating on the same roll.

A unique feature of the Razor is that it will operate from roll stock in any core size and will also operate from flat stock, stacked fan-folded stock, or right out of a printer. This feature makes it the best label applicator for boutique wineries and distilleries doing small batches or short runs.
